VOL. 58, NOS. 1–2

MARCH 1992

Comparison of three resistance methods for estimating heat flux under stable conditions T.B. Ottoni (Rio de Janeiro, Brazil), A.D. Matthias, D.C. Slack (Tucson, AZ, USA) and A.F. Guerra (Planaltina, Brazil).....	1
Comparison of five water stress predictors for the tropics M.R. McCaskill (Aitkenvale, Qld., Australia) and I.K. Kariada (Qld., Australia).....	19
Net photosynthesis: corrections required of leaf chamber measurements S.D. Idso (Phoenix, AZ, USA)	35
The effect of climate on tomato transpiration in greenhouses: measurements and models comparison O. Jolliet and B.J. Bailey (Silsoe, UK)	43
Remotely measured canopy temperature of greenhouse strawberries as indicator of water status and yield under mild and very mild water stress conditions J. Penuelas, R. Save, O. Marfa and L. Serrano (Cabril, Spain).....	63
Total leaf areas of single trees of <i>Eucalyptus grandis</i> estimated from transmittances of the sun's bean A.R.G. Lang, (Canberra, A.C.T., Australia) and R.E. McMurtrie (Kensington, N.S.W., Australia)	79
Flux-gradient relationships above tall plant canopies P. Cellier and Y. Brunet (Thiverval-Grignon, France)	93
A comparison of geostatistical procedures for spatial analysis of precipitation in mountainous terrain D.L. Phillips, J. Dolph and D. Marks (Corvallis, OR, USA)	119
<i>Short Communication</i>	
US temperature/precipitation relationships: implications for future 'greenhouse' climates S.B. Idso, and R.C. Balling, Jr. (Tempe, AZ, USA).....	143
<i>Book Reviews</i>	
Heat and Water Transfer in Bare topsoil and the Lower Atmosphere	149
Dahlem Workshop on Exchange of Trace Gases between Terrestrial Ecosystems and the Atmosphere	151
Natural Areas Facing Climatic Change	153
Guide for Authors	159

- The dependence of canopy layer turbulence on within-canopy thermal stratification
 (A.F.G. Jacobs, J.H. van Boxel and R.H. Shaw)
 Measurement and prediction of greenhouse ventilation rates (J.E. Fernández and B.J. Bailey)

VOL. 58, NOS. 3-4

1 APRIL 1992

Research Papers

Energy balance and evapotranspiration from a subarctic forest P.M. Lafleur (Peterborough, Ont., Canada).....	163
Climatic impacts on dryland winter wheat yields by daily soilwater and crop stress simulations K.E. Saxton (Pullman, WA, USA), M.A. Porter (Toowoomba, Qld., Australia) and T.A. McMahon (Parkville, Vic., Australia).....	177
A note of caution concerning the relationship between cumulated intercepted solar radiation and crop growth T.H. Demetriades-Shah, E.T. Kanemasu, I. Flitcroft (Griffin, GA, USA) and M. Fuchs (Bet Dagan, Israel)	193
Effect of aerodynamic resistance on energy balance and Penman-Monteith estimates of evapotranspiration in greenhouse conditions L. Zhang (Brussels, Belgium) and R. Lemeur (Ghent, Belgium)	209
Measurement and prediction of greenhouse ventilation rates J.E. Fernández and B.J. Bailey (Bedford, UK)	229
The dependence of canopy layer turbulence on within-canopy thermal stratification A.F.G. Jacobs (Wageningen, Netherlands), J.H. van Boxel (Amsterdam, Netherlands) and R.H. Shaw (Davis, CA, USA)	247
Calibration of an energy flux model over bare soils during the HAPEX-MOBILHY experiment M. Ben Mehrez, O. Taconet, D. Vidal-Madjar (Issy-les-Moulineaux, France) and Y. Sucksdorff (Helsinki, Finland)	257
Estimation of stomatal resistance and canopy evaporation during the HAPEX-MOBILHY experiment M. Ben Mehrez, O. Taconet, D. Vidal-Madjar (Issy-les-Moulineaux, France) and C. Valencogne (Pont de la Maye, France)	285
<i>Book Review</i>	
Fundamentals of Biometeorology. Interactions of Organisms and the Atmosphere. Volume 1: The Physical Environment.....	315
<i>Meeting Review</i>	
Second World Climate Conference: Overview presented at the International Conference on Agricultural Energy and Environment, Paris, 6 March 1991	319
<i>Contents of Vol. 58 (1992)</i>	323
